

SeeMyPorters

Transporter Management Application

Transporter management is an important and challenging aspect in patient care and hospital operations. Patients need to be transported to rooms, OTs, specimen collection points, scanning centers, and vehicles. Similarly, materials such as equipment, medicines, specimens, lab/procedure reports and files need to be delivered to the right place at the right time. Delays in movement of patients and materials lead to long wait times for patients. In healthcare services where every minute counts, delays and unavailability of staff can adversely impact patient wellbeing and quality of care.

Our Solution

SeeMyPorters helps to digitize and automate transporter allotment for point-to-point movement of patients and material within hospital environs.

- Dashboards provide a bird's-eye view into operations, process bottlenecks, and performance indexes
- Turnaround time for each step in the process is monitored and deviations are notified in real-time
- Trip progress can be tracked ensuring wider visibility into assigned tasks
- The application automatically assigns transporters who are closest to the pick-up area and displays near real-time status of tasks from pickup to drop
- Mobile app for transporters provides notifications and updates on tasks, option to request permission to take breaks

Hospitals

- **Reduced Workflow Distractions**
Focus on patient wellbeing
- **Process Transparency**
Visibility into transporter proximity, availability, and idle time
- **Improved Asset/Resource Utilization**
Productive hours for all transporters
- **Automated Task Allotment**
No manual intervention – allocation is prioritized based on transporter idle time
- **Balanced Workload**
Assignment based on idle time and time on transport
- **Deviation in Movement**
Notifications on deviations

Patients

- **Predictability in Time to Attend**
Smart allocation of transporters
- **Save Time**
Reduce wait time and delays

Impact and Savings

Load conditions: 300 movements a day, 20 transporters in a leading hospital in South India

- **Person days saved per month**
Nurses: 120+ | Supervisors: 45+ | Transporters: 35+
- **Response time improvement**
Average response time improved from 24 minutes to 9 minutes

Business value

- **Kick start with zero/minimal upfront investment**
- **Immediate ROI**

SeeMyMachines has its footprint in India, Middle East, and South America.
