Sterile Instrument Pathway

Surgical Sponge Tracking

Asset Management

Task Management

ENABLING HOSPITALS IN THEIR DIGITAL TRANSFORMATION

Transporter Management

- Digitize and Automate transporter management
- Reduce wait time for patients
- Reduce workflow distractions and achieve process excellence

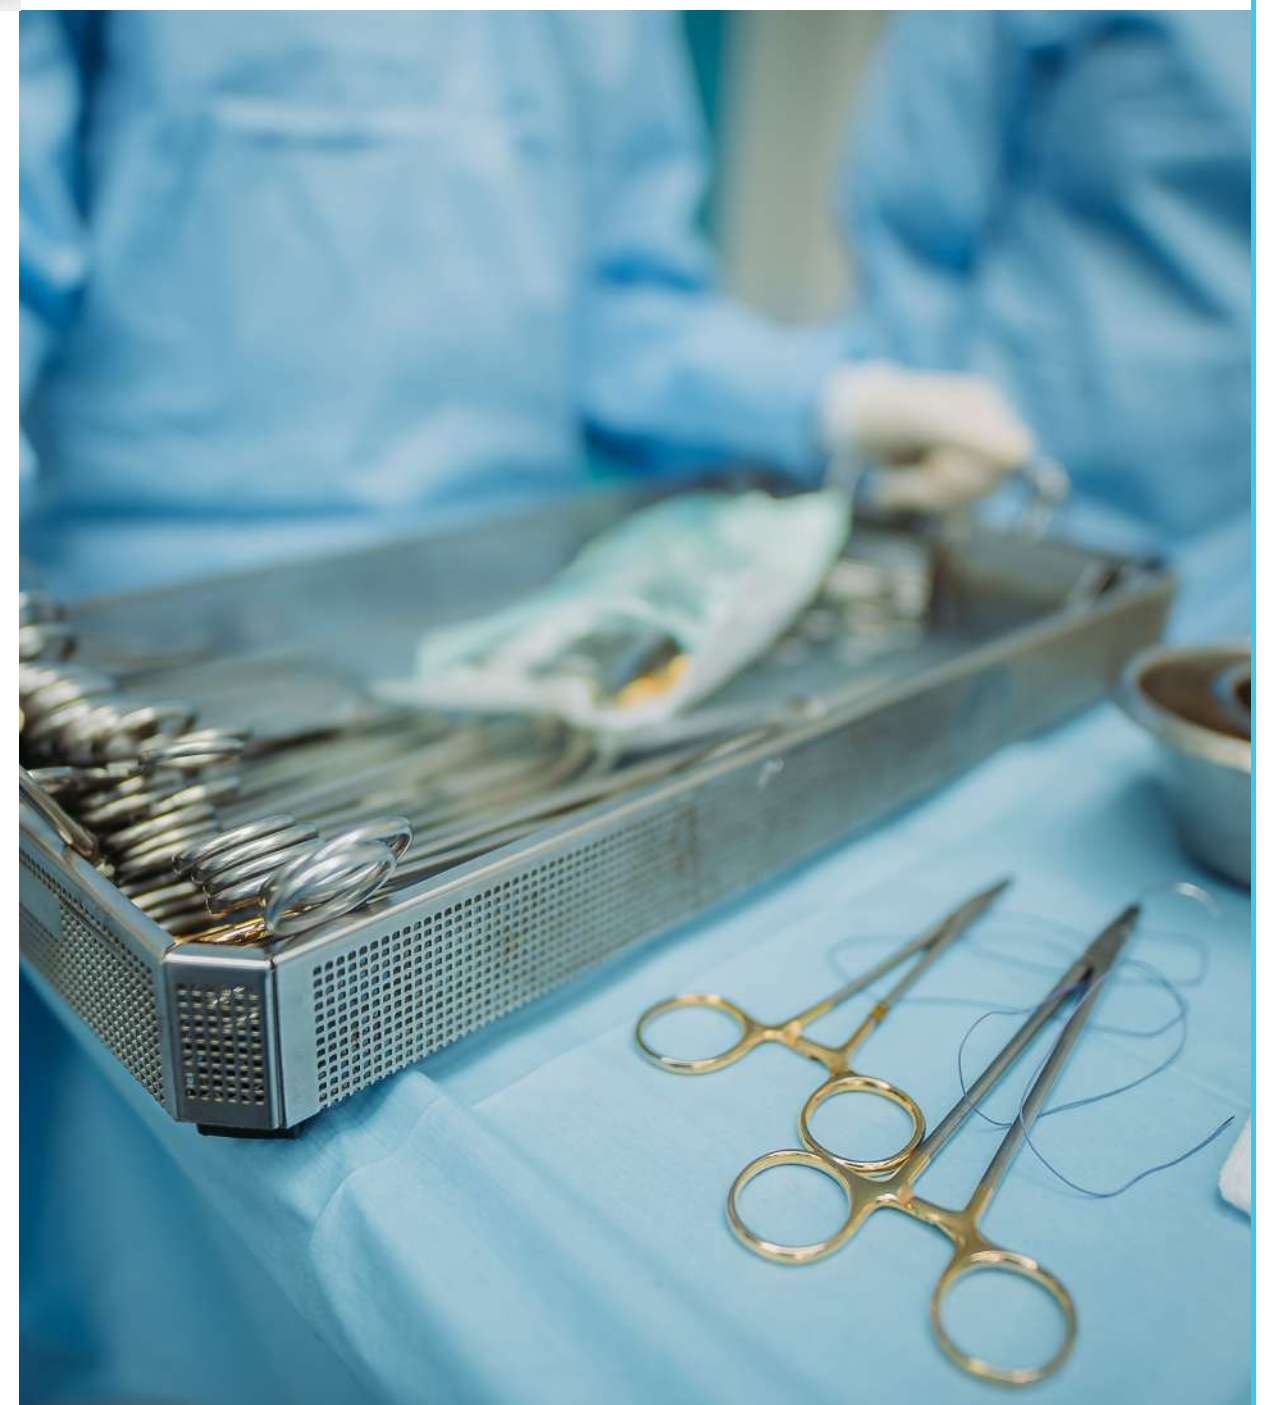

Task Management

- Plan, Track, and schedule housekeeping tasks within a Hospital
- Dashboards provide a birds-eye view into operations
- TAT's can be monitored for each task

Sterile Instrument Pathway

- Track and trace sterile/surgical instruments
- Identify anomalies, reduce wastage
- Be organized and updated with sterilization expiry information of inventory

Asset Management

- Manage the life cycle of assets from onboarding to condemnation
- Gain visibility into asset distribution, conditions, custodianship, location
- Definable reminders, PM schedules, service requests and digitized transactions
- Documents, vendor, spare, consumable management

Surgical Sponge Tracking

- Ensure all gauzes are accounted positively IN and OUT of a surgery
- Digitized verification of individual packets and sponges
- Insights into consumption and enable reduction of wastage
- Ensure zero tolerance on safety of patients
